

# CHEMISTRY

| MINOR REQUIREMENTS<br>(22 credit hours) |                                   |                 |
|-----------------------------------------|-----------------------------------|-----------------|
| SEMESTER<br>OR TERM                     | COURSE<br>NUMBER & TITLE          | CREDIT<br>HOURS |
| CORE (16)                               |                                   |                 |
|                                         | CHE 201 General Chemistry I (GE)  | 4               |
|                                         | CHE 202 General Chemistry II (GE) | 4               |
|                                         | CHE 301 Organic Chemistry I       | 4               |
|                                         | CHE 302 Organic Chemistry II      | 4               |
| ELECTIVES (6)                           |                                   |                 |
|                                         |                                   |                 |
|                                         |                                   |                 |
|                                         |                                   |                 |
|                                         |                                   |                 |

**Program Coordinator:** Dr. Barbara van Kuiken

**Core (16):**

CHE 201 General Chemistry I (GE) (4)  
CHE 202 General Chemistry II (GE) (4)  
CHE 301 Organic Chemistry I (4)  
CHE 302 Organic Chemistry II (4)

**Electives**(at least 6 credit hours from among these courses):

CHE 375R Topics in Chemistry (Var.) as approved by program coordinator  
CHE 383 Introductory Biochemistry (3)  
CHE 481 Bio-Organic and Medicinal Chemistry (3)  
CHE 482 Biochemistry (5)
