

SOUTHERN VIRGINIA UNIVERSITY

IT File Sharing Policy

It is our policy not to work on machines with file sharing and torrent programs installed. This includes programs such as:

- **Limewire/FrostWire**
- **Azureus Vuze**
- **µTorrent**
- **Shareaza**
- **BitTorrent**
- **Ares**

If while fixing your computer, we discover that one (or more) of these programs is installed on your computer, we will not be able to proceed with it until you give us permission to remove the installed programs and any/all copyrighted music/movies.

If you do not want us to remove the programs and any related music/movies, then we will be unable to proceed and will ask that you come and pick up your machine.

We are sorry if this causes an inconvenience, but our Acceptable Usage Policy explicitly forbids this kind of material on machines, and we are not authorized to support persons using such programs.

Thank you for your cooperation,

-The IT Staff
